

2024  
**UrjaVarta**  
Collaborate • Innovate • Synergize

## SAVE THE DATE

**Date:** 11-12 July 2024

**Venue:** Bharat Mandapam, New Delhi

India's upstream oil and gas sector is pivotal in meeting the nation's energy demand and propelling economic growth. With India striving to boost domestic oil and gas production to satisfy its escalating energy needs and reduce reliance on imports, stakeholders are exploring innovative strategies for exploration, production, and sustainable development. The goal is to successfully address the Energy Trilemma principally on energy security, affordability and sustainability by attracting investments, leveraging best practices, and deploying advanced technologies to unlock the vast potential of its hydrocarbon resources, much of which remains untapped.

Regulatory reforms, technological advancements, and evolving market dynamics shape the discourse as industry leaders, policymakers, and experts convene to discuss opportunities, challenges, and the path forward. In this context, fostering collaboration, innovation, and synergy among industry participants is crucial for progress.

We are excited to announce **UrjaVarta**, a two-day conclave designed to serve as a strategic forum for industry operators, policymakers, service providers, experts, think tanks, and academia to ideate, exchange knowledge, network, and collaborate towards realizing the full potential of India's upstream hydrocarbon resources in a sustainable manner.

**Please mark your calendars for UrjaVarta 2024, the first edition of DGH's upstream sector conclave, to be held on 11th and 12th July 2024 at Bharat Mandapam, New Delhi, India.**

**UrjaVarta 2024** will encompass insightful sessions, interactive workshops, and networking opportunities revolving around the overarching theme of "**Collaborate, Innovate, Synergize**". The conclave aims to focus on following key themes:

**Collaboration and Partnerships** between industry players, policymakers and other stakeholders to address common challenges and foster innovation

**Technology Innovation** in areas of exploration, drilling, and production for driving operational excellence

**Digital Transformation** of upstream operations to optimize processes, enhance reliability of operations and decision-making by leveraging data analytics, IoT and AI

**Policy and Regulatory Incentives** to attract investments and enhance ease of doing business in the sector

**Decarbonizing the Upstream Operations** by evolving strategies for reducing carbon footprints and minimizing methane emissions

**Emerging Investment Opportunities** in Indian upstream industry

Stay tuned for more details on registration and the full agenda!

We look forward to your participation in making this event a success. Your presence will be invaluable as we collaborate, innovate, and synergize to shape the future of the upstream sector in India.

Directorate General of Hydrocarbons
